

# Meth Decontamination Equipment List

Prices listed do not include sales tax or shipping if delivered

Below are a list of items needed to complete methamphetamine decontamination. Quantities will depend on number of people in your work crew. We recommend a minimum of two extension poles, one car wash brush, one shop vac, one paint sprayer, one foamer, two buckets, one heater per 400 square foot of house (winter only), one full face respirator for each person tasked with spraying product (typically one or two per crew), one half face respirator per crew member, typically three suits per crew member per property, one respirator cartridge set per crew member per house, one t-bar, one package of ten scrubber pads, and two kits of Meth Remover product for low meth level 1500 square foot home. (Additional brushes and t-bars may be useful to have on hand.)
