

**The AX174KIT includes the following items:**

- 3x3W UV Light
- Hard Case
- UV Glasses
- 3 Lithium Ion Batteries and 2 Magnetic “Nubs”
- 4 Slot Lithium Ion Charger

Note: The magnetic nubs help to ensure a good electrical connection between the batteries. If the magnet is lost, the plastic insulation around the battery can be removed to maintain a good connection between the batteries.

**Assembly Instructions:**

1. Before putting the flashlight together, charge the lithium ion batteries for 8-10 hours in the charger. A red light indicates the batteries still need to be charged, and a green light indicates the batteries are charged.
2. Attach 1 magnetic nub to the positive top of 2 batteries.
3. Place first battery without nub into flashlight with the positive end toward the head.
4. Insert second battery with nub, making sure to keep the positive end facing towards the head of the light
5. Add the third battery with the nub on the positive end.
6. Firmly screw the light shut.
